**November
29-30, 2014**

Venue: Jadavpur University, Kolkata 700032

Welcome:

Medicinal plant represents a unique opportunity for interdisciplinary research and we strongly believe that extensive research through collaboration and cooperation can be of help for their promotion and development. The complexity of herbal medicine preparations from medicinal plants and the interpretation of bibliographic data on safety and efficacy, reflecting the experience gathered during long term use are best addressed by involving specific expertise and experience. This seminar will focus on some crucial and contemporary issues on medicinal plant research particularly their identification, quality evaluation and validation of their ethnopharmacological claims.

The School of Natural Product Studies, Jadavpur University is dedicated to the promotion of knowledge on natural product and the dissemination of information through educational programs, research activities and sharing of experiences on the scientific validation of medicinal plant for betterment of healthcare of the society. This seminar will provide an ideal platform for interaction and dissemination of knowledge between scientists and professionals in different areas of medicinal plant research.

An array of scientists, technologists, regulatory authorities and health care professionals from various parts of India will deliver lectures on several important topics on opportunities in medicinal plant research. We invite you to join in the program and wish you all a fruitful and effective scientific interaction during this two days program at our University.

Targeted Audience:

We welcome all the academicians, students, teachers and researcher from university, institutes and industries, health care professionals, NGOs, cultivators of medicinal plants, industrialists and all other who are interested in the promotion and development of medicinal plants to join in this event to share their views and expertise.

We welcome scientific oral and poster presentations from the researchers from industry and academia.

Seminar highlights:

- ❖ Dissemination of knowledge on education and research for promotion of medicinal plants
- ❖ Evidence based approaches for development of medicinal plants in traditional medicine
- ❖ Chemo profiling of medicinal plant; development of analytical techniques for quality control, and standardization of herbal medicine
- ❖ Phytochemical, pharmacological, microbiological and high throughput screening of medicinal plants
- ❖ Scientific validation of ethno pharmacological claims: Promotion and development of complementary healthcare with medicinal plants
- ❖ Pharmacognostic study of medicinal plant.
- ❖ Evidence based documentation on safety, efficacy and quality of medicinal plant from Indian systems of medicine including Ayurveda, Homeopathy etc.
- ❖ Development and evaluation of herbal formulations from medicinal plant through industry institute partnership
- ❖ Globalization of traditional medicine and medicinal plant – Globalizing local knowledge and localizing global technology.
- ❖ IPR, patents and regulatory issues related to medicinal and aromatic plants (MAP)

Resource persons:

Eminent academicians, experts, scientists, researchers from universities, industries and research organizations will share their research experiences.

Call for Papers:

Research contributions are welcome for oral and poster presentation. All the abstracts should be submitted by e-mail as attachment at isesnpsju@gmail.com until October 30, 2014. The abstracts should be written by Microsoft word in “doc” or “docx” format and should not exceed 250 words. The submitting author must be registered for the seminar. The scientific committee will review the abstracts, and their decision will be communicated to the communicating author after November 05, 2014. All accepted abstracts will be published in the seminar proceedings.
